INDEX TO VOLUME NINE OF THE POLICY STUDIES JOURNAL

The following indexes of subjects and authors cover the four regular issues and the four special issues of volume 9 of the Policy Studies Journal. The eight issues covered in this index deal with a great variety of policy problems, especially taxing/spending, health, environment, social values, reapportionment, urban service distributions, and administrative reform. The subject index mainly covers the basic concepts included in the titles and subtitles of the symposium and non-symposium articles and in the titles of the books reviewed. The bodies of the articles and book reviews were also consulted to clarify the concepts derived from the titles. The authors index covers authors of articles, authors of books reviewed, and reviewers of books, but not names referred to in the articles. Future annual indexes will appear at the beginning of the first issue of each volume to cover all the issues in the previous volume which have been published before that first issue goes to the press.
